

Upstream Psychiatric Consultation Clinic Checklist

This program will allow primary care providers of MHCSS/OYJSN partner organizations an opportunity to refer adults and youth patients, 16 years of age and older, with a suspected mental health conditional (with or without an addiction component) for a consultation with a dedicated group of psychiatrists from The Royal. This program is not intended for urgent mental health needs, on-going treatment or follow-up. All agency referrals must have a primary care provider to ensure on-going support and follow-up and have a valid OHIP number. Please note: all psychiatric consultations will be held via the Ontario Telemedicine Network (OTN) in partnership with The Royal.

Please ensure the referral form is completed.
